

INTEGRATED SERVO & STEPPER MOTORS

TOLOMATIC ACTUATOR & JVL INTEGRATED MOTOR

TOLOMATIC AND JVL PARTNERSHIP

Tolomatic has partnered with JVL to provide integrated servo and stepper motors paired with Tolomatic's broad range of configurable actuators. JVL's innovative motors are integrated with the drive control electronics, providing a flexible motion control solution that can exist outside of the control cabinet. These motors pair seamlessly with Tolomatic actuators and can be ordered together to provide a all-in-one solution for your automation needs.

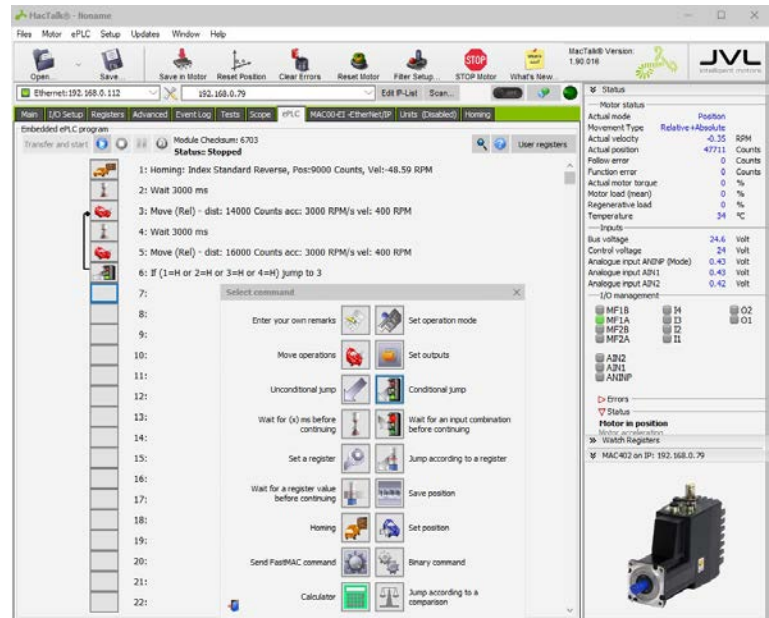

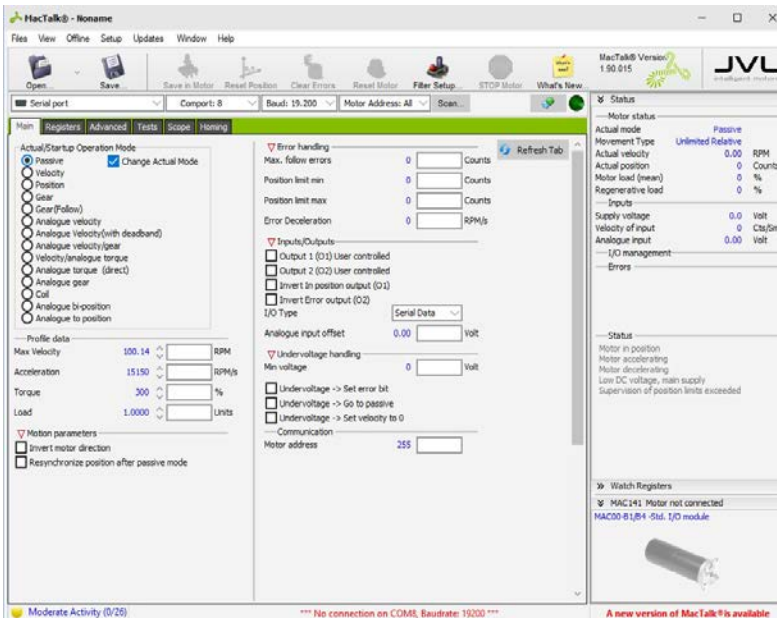

JVL INTEGRATED MOTOR FEATURES

- Added features like **Safe-Torque-Off** and **Absolute multi-turn encoders** on listed premium configurations (see table)
- High efficiency, quiet and maintenance free operation
- Fast installation with fewer opportunities for wiring errors
- Easy setup and configuration, featuring JVL's MacTalk® software
- Digital I/O and Ethernet/IP Communication options available as standard options.

MacTalk® ALL-IN-ONE SOFTWARE

- Simple, intuitive software for drive commissioning and E-PLC programming
- E-PLC allows JVL motors to function without use of a standard PLC; allows for system/software modularization when used with a standard PLC
- Easy IO – IO mapping not required
- Automatic bus voltage detection
- Flexible motion command options; commands can be updated mid-move
- Programming for electronic gearing, axis synchronization

JVL INTEGRATED SERVO MOTORS

- Speeds up to 4000 RPM and peak torque ratings up to 33.6 in-lb (3.8Nm)
- Tolomatic standard offering includes: MAC 140, 141, 402 motors

MAC 140/141

MAC 402

JVL INTEGRATED STEPPER MOTORS

- Speeds up to 3000 RPM and peak torque rating of 44.4 in-lb (5 Nm)
- Tolomatic standard offering includes: MIS 173, 232, 341 motors

MIS 173

MIS 232

MIS 341

TOLOMATIC OFFERING

For our customers' convenience, a selection of JVL servo and stepper motors have been pre-configured and are offered in the form of either a standard or a premium option. Standard motors are equipped with incremental encoders, digital I/O communication, and ePLC programming. Premium motors can include additional features such as Absolute Encoders, Ethernet I/P communication, and Safety Torque Off (STO). For more information on the JVL features Please visit: www.jvl.dk

NEED TO OPTIMIZE ON COST?

For applications where precise motion location is not necessary the MIS232 open-loop, with digital I/O control motor is a good solution to reduce system costs. This motor does not require an encoder and is a perfect solution for price sensitive applications.

SPECIFICATIONS

	Config.	Supply Voltage	Speed Range	Cont. Torque		Peak Torque		Rated Power	Rotor Inertia		Encoder Options
				lb-in	Nm	lb-in	Nm		lb*in ²	kg*cm ²	
Integrated Servo Motors	MAC140	12-48VDC	4000	2.83	0.32	7.97	0.90	134	0.059	0.173	8192 CPR, abs multiturn or 4096 CPR, incremental
	MAC141	12-48VDC	2700	4.25	0.48	14.07	1.59	134	0.078	0.227	
	MAC402	12-48VDC	3000	11.33	1.28	33.63	3.80	400	0.116	0.340	
Integrated Stepper Motors	MIS173	12-72VDC	3000	4.96	0.56	-	-	142	0.018	0.054	4096 CPR, magnetic + abs multiturn or 1024 CPR magnetic semi-abs
	MIS232	12-72VDC	3000	15.75	1.78	-	-	85	0.164	0.480	
	MIS341	12-72VDC	3000	44.43	5.02	-	-	220	0.923	2.700	

Temperature range for all motors 0-40°C (32-104°F)
