Stainless Steel Servo Motor

- All stainless steel construction
- IP69K sealed for high-pressure wash-down applications
- Hygienic, clean design
- EtherNet/IP enabled Drive

APPLICATION:

Tolomatic developed this hygienic, low-cost, stainless steel motor to meet the growing needs of wash-down applications in the food and beverage industry. When combined with the [ERD15, 20 and 22 sizes of electric rod actuators](#), this motor/actuator solution can be used in food stacking, [pumping](#), [filling](#), shaker tables and [sorting](#) applications.

CUSTOMER BENEFITS:

This cost-effective stainless steel, IP69K motor/actuator solution, provided a hygienic solution which eliminated extra guarding necessary when using other actuators. Additionally, the actuator was controlled by an EtherNet/IP enabled [ACS drive](#) with [Add-On-Profiles \(AOP\)](#) and [Add-On-Instructions \(AOI\)](#) for easy integration with existing Rockwell control components.

- Reduction in total machine cost
- Less down-time spent cleaning machinery
- Easy integration with Rockwell Automation PLCs

OTHER APPLICATIONS:

Use this Tolomatic motor/actuator solution in other [food and beverage](#) applications as well as other industries requiring a clean solution such as [medical device and pharmaceutical](#) applications or where corrosive environments such as coastal outdoor regions are a concern.
